

International Forum for Excellence in Higher Education

Presents

**3rd International Tour: Exploring Best Practices
United States of America**

8 Jun, 2014 to 15 Jun, 2014

For
Owners, Managers, Trustees, Directors, HODs

About IFEHE

IFEHE was started with a vision of contributing to the world of higher education by introducing a culture of continuous learning. IFEHE evaluates the best of the practices from all over the world, studies their scope of implementation in Indian scenario and helps in executing them by bringing the right kind of expertise. Our Board of advisors has Professors from IITs and IIMs, who play a pivotal role in our quality assurance.

Our offering stems out from the detailed research which we do on the ground level. The hands on problems that educational institutions face becomes the starting point of our product development. We are working on core issues like Leadership, Faculty Training, Students Development, Value Education, Innovative Pedagogy and IT implementation. We have catered to more than 500 Engineering Colleges and B-School through our in house & open house programs.

Premise

Post liberalization, the economy of India has been one of the fastest growing economies in the world and so have been the aspirations and dreams of the largest and youngest population of the world.

As people have ventured out in search of good education in the past, the local education sector has also metamorphosed from an unorganized one to one which is hungry to adopt the best of the practices prevailing across the globe. Sensing this need, the international visit has been started as an annual event by IFEHE.

Why United States of America

Enriched with globally renowned institutes for higher education like Harvard, MIT, Cornell, Stanford that rank among the first five in fields like management, science and medicine coupled with educational practices that are par excellence, USA offers a platform for growth and learning at all levels - student, teacher or administrator.

Today USA contributes towards 30 percent of world's research output while we enjoy their success stories like the Internet, Google, Pharma products and state of the art operating systems in our daily lives.

The nation wins hands down with 3% of GDP being allocated to Higher Education. Thus to understand this culture and bring home the best practices we choose to visit the true superpower.

Aim of the visit

1. To understand the difference between the application of education techniques between India and other countries.

2. To expose Indian Higher Education Institutes Owners, Mangers, Trustees, Directors, HODs to the International good practices on teaching, curriculum management, leadership, administration and education philosophy by bringing them face to face with the academicians and education researchers of that particular country.
3. To forge long term relationships and initiate exchange programs.
